

Pre-heats fresh air for ventilation.

Features:

- High efficiency EC motor for electrical savings
- Up to three speeds if multiple exhaust devices are present
- Each speed is field programmable from 1%-100% of rated airflow.
- Temperature adjustable controls for setting delivered air temperature through simple on/off operation of the pump(s). (or optional variable speed pump).
- Includes internally mounted coil and pump.
- 120 volt, 1 ph., less than 12 amps.
- Field supplied motorized damper, filter rack and filter.
- Multi-positional: upflow, downflow and horizontal.
- Fresh air inlet from back, left, right or bottom.
- Cold weather models include extra externally mounted, cased coil and pump.

Moderate Climate (-4°F or -30°C)	Amps	Maximum Airflow (cfm)
MUA800-EC	4	800
MUA1400-EC	6	1400

Cold Climate	Amps	Maximum Airflow (cfm)
MUA700C-EC	4	700
MUA1300C-EC	6	1300

Physical Properties

120 volt, 1 ph., less than 12 amps

1. MUA800 and MUA1400 based on 30% glycol and 160F minimum boiler water temperature.

* 50% glycol recommended below -20C

2. MUA700C and MUA1300C based on 50% glycol and 140F minimum boiler water temperature.

** Airflow derating required at lower design temperatures, contact factory.
